

JOB VACANCY

Fonction: Windows System Administrator Trainee (M/F)

We are looking for a Windows System Administrator Trainee (M/F) to reinforce the IT Services team.

Vacancy:

You are part of the Microsoft Windows VMWare administration team, in a production environment.

You will maintain operational and resolve critical incidents of Windows 2008/2012 server infrastructures and associated services (AD, DNS, DHCP and GPO).

Perform data backup operations to VEEAM BACKUP.

You take care of the virtual machine and adapt the infrastructure based on the user needs.

Perform reporting and you are service oriented and your persuasiveness makes it possible to contribute to the continuous improvement of services and thereby reduce the number of server incidents.

Moreover, you know and manage the following programs: Exchange, SharePoint and SQL.

The initial working period is 6 months, with strong possibility to evolve to permanent position (CDI).

Profile:

You have diploma BAC+3/5 in systems and network and you have administration experience in production environment.

You have a very good level on implementation and administration of virtual machines on VMWare ESXi.

You also have knowledge of the day to day administrative tools of Microsoft infrastructure.

Linux knowledge appreciated.
